

AMMIB 2024

18 avril - ENS PARIS SACLAY

Amphi : Dorothy Hodgkin

Presentation

- Every year, this workshop brings together researchers, professors, students, and postdocs from institutions in Paris-Saclay working in the field of molecular modeling of biological systems, as well as experimenters interested in simulations.
- The topics covered in this workshop are highly multidisciplinary, ranging from quantum chemistry to coarse-grain models, from classical mechanics to artificial intelligence, united by the common goal of understanding the molecular mechanisms of life.
- AMMIB aims to foster informal exchange and discussions among researchers and students. Sessions are available for oral presentations and scientific posters. Contributions from PhD students and postdocs are encouraged.
- Registration is free but mandatory, and open until Sunday, 31 March.
